Eng - "What is literacy?"

08/27

Literacy as described by Gee

1. Define Literacy: As described by Gee  
literacy is the way you use language,  
of thinking & of acting to identify yourself.  
My definition of literacy is using your  
knowledge on something, anything and  
expressing it based off of what you know.
2. What's the difference between the  
learner & the acquirer?
  - The acquirer might not necessarily want  
to learn what they are around and  
being exposed to but they acquire it  
anyways through the exposure. Where as  
with the learner you want the knowledge,  
you go through tedious processes to learn.
3. What's the difference in primary &  
secondary learning?
  -
